

Using play to implement changes and develop design thinking skills. Learning through an interactive experience. Opening dialogues on sustainable living.

## FACILITATION

**Team-Building and workshops  
at work or school**

Are you?

- ▶ Looking for a team-building activity that will bring awareness and mobilize your team to sustainable development.
- ▶ A school, looking for a tool or an activity to increase learning on environmental education and sustainable living.

## DESIGN

**Consultation, co-creation and  
game design made for you**

Are you?

- ▶ A professional, an institution or a business curious to use play in your practice or keen to add a game to your toolkit.

**We can assist you in transforming your practice or create something new with or for you. Let's talk about your needs. Contact us at [info@jeuxwasa.com](mailto:info@jeuxwasa.com)**

**GOLD Winner at  
*Jeux de la Francophonie***

Jeux WASA represented Équipe Canada at the 8th *Jeux de la Francophonie* and won GOLD medal in the discipline "Création pour le développement durable".

# JEUX WASA GAMES

## Quartier Durable

*You have just been elected to the city council. During your next term in office, you will build a neighborhood, as green as you can think of, covering topics such as housing, waste management, governance and more!*

Quartier Durable is the first board game to be based on Quebec scientific data. Following the construction phase, players take part in a plenary session where neighborhoods are analyzed, and discussions are raised about sustainable development.

## Obsolescence

Immersive simulation of the world market for electronic devices. The group must team up to reach the given objectives of manufacture, with limited time and resources. Designed to develop awareness on manufacture, consumption and waste management of electronics. Following the construction phase, players take part in a plenary session where we analyze the results and open a discussion on obsolescence.

Designed in partnership with Amélie Côté and l'Atelier Soudé.

## Key assets

- Facilitate **decision-making** and **peer learning**, sharing knowledge;
- Reinforce **cohesion** of teams, reinforce communication skills;
- Develop resources to implement **behavioral changes**, to take action.

All our games are based on scientific data. Other Games available upon request.

## Get a license or rent it!

### Use it for a year or a week

Are you?

- A professional, an institution or a business curious to add a game to your toolkit to maximize your impact.
- A school, looking for a tool or an activity to increase learning on environmental education and sustainable living.

## CLIMAT : Training on Climate Change Management

Following the success of Quartier Durable, we teamed up with Carbon Consult Group to offer you a **gamified training, unique on the market, aimed at making the management of climate-related business issues intuitive.**

For who? Essential for managers responsible for strategy, finance, operations, and the environment. Intended for organizations of all sizes.

Key assets? This training allows participants to acquire knowledge and key concepts, both in of greenhouse gas (GHG) emissions and in the adaptation of operations to climate change risks.

**All details at [carbonconsultgroup.com/en/climat-game](https://carbonconsultgroup.com/en/climat-game)**

## Corporate

Looking for a team-building activity that will bring awareness and mobilize your team to sustainable development? Keen to learn your team's interests for your sustainable policy? Our sessions are a bridge between team-building and training. They are designed to trigger sustainable and organizational changes within the work environment.

**« C'est vraiment très instructif. Devoir trouver consensus sur des choix stratégiques est un bon point pour le développement de l'entreprise. »**
